

## Laerdal Nursing Baby

Nursing Baby training includes sounds auscultation, IV and IO skills, fontanel assessment, urinary catheterization and general pediatric patient care. This infant is unrivaled for clinical training in core pediatric in-hospital clinical skills.

\*The SimPad PLUS System is required for operation of the Nursing Baby SimPad Capable Simulator. Sold separately.

365-05050 Nursing Baby for SimPad

### Consumables

365-00201 Infant IO Leg

365-00101 Infant IV Leg

365-00301 Infant IV Arm

### Product Benefits:

- Educationally effective for training of in-hospital infant skills
- Pre-programmed scenarios provide standardized training while customizable scenarios and real-time instructor control allows adaptation to meet individual student's needs
- Effective education in the special care of infant patients
- Economical and educationally efficient skills and scenario-based trainer for care and management of a variety of common and uncommon in-hospital infant patients in multiple clinical settings and hospital transport
- Durable, rugged and lifelike; made to withstand years of use

### Product features:

- Normal, bulging and depressed fontanels for assessment and diagnosis
- Head with anatomical landmarks, trachea and esophagus along with simulated lungs and stomach allow the practice of many procedures, including NG, OG, tracheal care and suctioning
- Articulating IV arm and IV leg allow for practice of IV cannulation, medication administration, site care and maintenance
- Medication and fluid administration through intraosseous infusion allowed via tibia access with landmarks at the tibial tuberosity and medial malleolus
- Gastrostomy tube opening for care and feeding
- Presents normal and abnormal heart, breath, and bowel sounds for auscultation
- Interchangeable genitalia allows for urinary catheterization with fluid return, rectal temperature simulation, and administration of suppositories
