
Overview
Laerdal® ALS Baby™

The Laerdal® ALS Baby™ is a portable skill trainer for realistic infant resuscitation training.

Laerdal ALS Baby manikin is a three-month-old infant with an anatomy that offers exceptional realism for individual training. The Laerdal ALS baby offers the opportunity to practice advanced resuscitation skills, including airway management, professional rescuer CPR, vascular access, and 4-lead ECG monitoring.

Overview

Product benefits:

- Educational effectiveness - through practicing basic and advanced CPR skills
- Multifunction use - facilitates training of multiple skills needed for infant ACLS training
- Cost efficient - durable and dependable for long-term use and cost efficiency
- Anatomically realistic enables lifelike infant resuscitation training to be performed
- Portable infant ACLS skill trainer for training in all environments
