

Nursing Anne Simulator African Descent

Preparing future clinicians for diverse patient care

High fidelity patient simulator for basic to advanced training

Building communications and clinical competence

Improve student readiness to provide quality care for diverse patients with the Nursing Anne Simulator African Descent, one of several patient modules available with the only multi-patient modular platform designed for nursing education. This lifelike patient simulator is specifically designed to:

- Increase simulation fidelity
- Represent patient diversity respectfully
- Maximize training opportunities

Nursing Anne Simulator African Descent patient module is available as a fully pre-assembled simulator or as add-on accessories.

Equitable Care starts with Proper Preparation

Familiarize future clinicians with how to administer respectful care to diverse patients, strengthening their communications and patient handling skills to be more inclusive.

From basic assessments and critical thinking to advanced interventions, the Nursing Anne Simulator African Descent covers every aspect of modern nursing curriculum as a high-fidelity simulator as well as a skills trainer.

Enhancing Realism for Simulation Success

Nursing Anne Simulator African Descent delivers authentic training mirroring the complexities of patient care in a safe environment.

By replicating physical appearance, students form a deeper psychological fidelity with the patient. Such a connection gives the students an opportunity to practice caring for diverse patients in a more realistic and respectful way.
