

The manikin which combines training in extrication with airway management

[Add to compare](#)

Crash Kelly is a durable, rugged training manikin with an intubation head for advanced airway management training and realistic articulation allowing the manikin to be placed in various settings for extrication or rescue.

Product Benefits:

- Educationally effective for training in airway management and adult extrication
- Extremely durable, rugged and lifelike, made to withstand years of use
- Mobile for use in field extrication, triage and transport training
- Cost effective manikin can be used in multiples for triage and mass casualty training exercises
- Flexible manikin platform with optional modules to accommodate a wide range of training including trauma, NBC, bleeding control and first aid

Product Features:

- Intubation head with improved airway allows for insertion of standard airway devices with the addition of LMA, Combitube and the King LT
- Head can be tilted forward, backward or rotated 90 degrees to either side
- Right mainstream intubation
- Oropharyngeal and Nasopharyngeal airway insertion
- Bag valve mask ventilation
- Stomach auscultation to verify proper airway positioning
- Manually generated carotid pulse
- Articulated body for full range of motion
- Crash Kelly is 5'5" (162.5cm)
- Optional trauma modules may be added to enhance realism in scenarios
 - BTLS Victim Injury Set (275-00001)
 - Advanced Trauma Module Set (276-00001)
 - Trauma Module Set (276-10001)
 - NBC Module (276-15001)
 - Bleeding Trauma Modules (381550)

Full body carry case available for storage and transport
