

## Nursing Anne Simulator Male

Preparing future clinicians for complete patient care

*High fidelity male simulator for basic to advanced training*

## Helping train for the highest level of care

Improve students' readiness to provide quality care for male patients with the Nursing Anne Simulator Male, the latest addition to the only multi-patient modular platform designed for nursing education. The realistic, anatomical features are specifically designed to:

- Increase simulation fidelity
- Represent patient diversity respectfully
- Maximize training opportunities

Nursing Anne Simulator Male is available in medium or dark skin tones and is available as a full body pre-assembled simulator or an add-on modular upgrade kit.

## Designed for Nursing Education

The Nursing Anne Simulator Male extends clinical skills and simulation training across genders for a more inclusive realistic full-body solution that allows students to experience more diverse patient cases to better prepare them for practice.

From basic assessments and critical thinking to advanced interventions, the Nursing Anne Simulator Male covers every aspect of modern nursing curriculum as a lifelike multi-patient simulator as well as a skills trainer.

## Enhancing Realism for Simulation Success

Nursing Anne Simulator Male delivers authentic training mirroring the complexities of patient care but in a safe environment.

By replicating the physical appearance, students form a deeper psychological fidelity with the patient. Such a connection gives the students an opportunity to practice caring for diverse patients in a more realistic way.
